

Lesson plan

Name if the faculty : Dr. Gurbrinder Kaur

Discipline : Computer Science Engineering

Semester : 3rd

Subject : Data Structures Using C

Lesson Plan Duration : 15 weeks (From August, 2019 to November 2019)

Work Load (Lecture/ Practical) per week (in hours): Lecture-03, Practical-02

| Week | Theory | | Practical | |
|------|-----------------|---|---------------|---|
| | Lecture day | Topic(Including assignment/test) | Practical Day | Topic |
| 1st | 1 st | Introduction: Basic Terminologies: Concept of Data Structure, | 1st | Write a program to search an element in the array using Linear Search. |
| | 2 nd | Choice of right Data Structure, Algorithms, | | |
| | 3 rd | How to design and develop algorithm | | |
| 2nd | 1 st | Complexity of algorithms | 2nd | 1. Write a program to search an element in an array using binary search algorithm. 2. Write a program to show all operation in an array. |
| | 2 nd | Operations: <ul style="list-style-type: none"> • Insertion • Deletion • Traversal | | |
| | 3 rd | Linear Search | | |
| 3rd | 1st | Binary Search | 3rd | Write a Program to order alphabets of a word in Lexical order. |
| | 2nd | Techniques and their complexity analysis. | | |
| | 3rd | Revision of Unit I | | |

| | | | | |
|------|-----|--|------|---|
| 4th | 1st | Stacks and Queues: Stack and its operations, Algorithms and their complexity analysis, | 4th | 1. WAP Program to create Stack & perform its operations 2. Write a program to implement Stacks using arrays |
| | 2nd | Applications of stacks, Expression Conversion and evaluation | | |
| | 3rd | corresponding algorithms and complexity analysis | | |
| 5th | 1st | Queues: Types of Queue: Simple Queue, | 5th | 1. WAP to program to make a queue and perform all operations : 1. Insertion 2. Deletion 3. Traversing |
| | 2nd | Circular Queue ,Priority Queue | | |
| | 3rd | Operations on each types of Queues: Algorithms and their analysis. | | |
| 6th | 1st | Linked Lists: Singly linked lists, Representation in memory | 6th | Write a Program to create a Linked List & perform the following operations: a. Insert an element in the beginning b. Insert an element at the end c. Insert an element in between d. To delete a node e. Display the nodes f. Count elements |
| | 2nd | Linked List Operations: Insertion Deletion | | |
| | 3rd | Linked List Operations Traversing Searching | | |
| 7th | 1st | Linked Lists: Representation of Stack and Queue | 7th | Convert the singly list to doubly linked list and perform all operations |
| | 2nd | Doubly Linked List | | |
| | 3rd | Circular Linked List | | |
| 8th | 1st | Trees: Introduction to trees | 8th | Create a binary tree and implement the tree traversal techniques of inorder, preorder and post order. |
| | 2nd | Binary trees | | |
| | 3rd | Representation and traversal of trees | | |
| 9th | 1st | Types of binary trees | 9th | WAP to implement Binary Tree using Linked List. |
| | 2nd | Threaded binary trees, B Trees | | |
| | 3rd | B+ Tree, Application of trees | | |
| 10th | 1st | AVL Trees | 10th | WAP to Construct a Balanced Binary Tree (AVL Tree) for user input |
| | 2nd | Sorting and Hashing | | |
| | 3rd | Selection Sort | | |
| 11th | 1st | Bubble Sort | 11th | Write a Menu driven program to sort an array using the following algorithm a. Selection Sort b. Merge Sort c. Insertion Sort |
| | 2nd | Insertion Sort | | |
| | 3rd | Quick Sort | | |

| | | | | |
|------|-----|--|------|---|
| | | | | d. Bubble Sort e. Quick Sort |
| 12th | 1st | Merge Sort | 12th | WAP to Count Number of Leaf Nodes in a Tree |
| | 2nd | Heap Sort | | |
| | 3rd | Performance and Comparison among all the methods | | |

| | | | | |
|------|-----|-------------------------------------|------|--|
| 13th | 1st | Graphs: Introduction | 13th | WAP to Find the Shortest Path Between Two Vertices Using Dijkstra's Algorithm. |
| | 2nd | terminology, matrix' representation | | |
| | 3rd | operations on graphs | | |
| 14th | 1st | Applications of graphs | 14th | Revision Questions |
| | 2nd | Revision | | |
| | 3rd | Revision | | |
